

Zero Waste to Landfill (ZWL) Policy

Mahindra Susten Pvt. Ltd. is a leading Independent Power Producer (IPP) in India and aspires to become the World's most admired brand in renewable energy. We at Mahindra Susten believe that adopting the sustainable practices in all our operations is not only a business imperative but also is our responsibility to give back more to planet than we take and make our planet positive.

This policy applies to our sector office, construction sites, and ongoing operations. The primary objective of this policy is to efficiently manage our processes to minimize waste generation and actively promote a circular economy. This involves a strong commitment to eliminating the toxicity of waste and materials, conserving resources, and promoting resource recovery without resorting to burning or burying waste materials. Our overarching goal is to achieve "Zero waste to landfill," thereby preventing any detrimental discharges into the environment and safeguarding biodiversity. The principals we follow are: -

- Adhering to all relevant environmental laws, regulations, standards, and waste management requirements
- Complying with Extended Producer Responsibility (EPR) regulations to advance the circular economy throughout our value chain.
- Implement Waste management system which focuses on 5R principles i.e refuse, reduce, reuse, recycle and rot to minimize the waste out of supply chain Operations
- Optimizing the use of natural resources through more sustainable production and consumption
- Continually reducing our waste footprint by focusing on waste reduction at the source and incorporating technological solutions
- Recycling materials and conserving resources and energy at every stage of our value chain.
- Diverting waste away from landfills as much as possible
- Striving to achieve and sustain a "Zero waste to landfill" status by diverting over 99% of waste from landfills
- Raising awareness about our collective impact on resources and waste management while educating our consumers, employees, suppliers, and other stakeholders
